

# H.323 subscriptions

Get more from your existing meeting room systems

**StarLeaf H.323 endpoint subscriptions are an easy, cost-effective way to upgrade your existing meeting rooms.**

Update your existing meeting room systems with new features and functionality by registering them to StarLeaf.

A StarLeaf H.323 subscription gives new life, and added security, to systems that might have otherwise been replaced.

## Video meetings that work for everyone

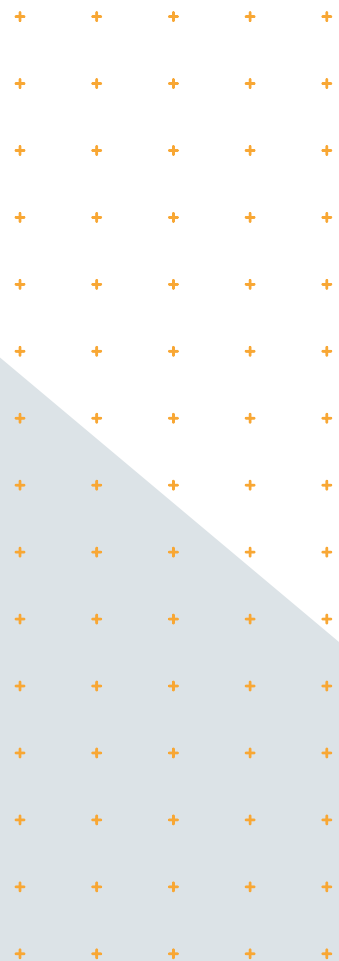

- StarLeaf supports the broadest range of third-party endpoints in the market, including Poly, Cisco, Lifesize, Avaya/Radvision etc.
- A StarLeaf connection makes it easy to call directly to other video services including Zoom, Poly, BlueJeans, Skype for Business, Cisco, and Lifesize
- With StarLeaf, everyone can access enterprise-grade video meetings, with licensing that works at volume

## Your meetings in safe hands

- StarLeaf H.323 subscriptions deliver industry-leading security including ISO/IEC 27001 certification and secure, certificate-based authentication
- StarLeaf data jurisdiction guarantee ensures your data remains under your control and in your own jurisdiction, with full geographical redundancy
- Our industry-unique 99.999% SLA uptime guarantee means your meetings always happen and ensures less than 5.5 minutes unscheduled downtime per year

## Intuitively simple, future-proof features

- Systems with a StarLeaf H.323 subscription are upgraded with enhanced functionality including unlimited direct calling, directory integration, bi-directional screen sharing, global audio dial-in, firewall traversal, and secure, reliable video meetings
- Automatic updates ensure systems are always ready with the latest cutting-edge features of the StarLeaf meetings platform
- Video communications that benefit your business
- Increase user adoption and productivity - your users get a premium video meetings service that's secure, reliable, and simple to use with no training needed
- Avoid the costs associated with replacing your video conferencing estate or adding network infrastructure to make it viable
- Reduce ongoing maintenance costs and IT burden with StarLeaf centralized management for all systems, reporting, and tailored support

## The human connection at work

StarLeaf is the messaging, meeting and calling platform that takes the friction out of secure business collaboration. It's a cleaner alternative to disjointed, complex and frustrating collaboration and video conferencing tools, helping people to connect quickly and easily, and enjoy what they do more too.
